

Step-by-step Installation guide for Arch Linux

This page outlines a basic installation of Arch upon which you can build your system

Info

Having [Arch wiki](#) and [installation guide](#) open on your mobile or other computer can be useful

Prerequisites

- Download the [latest Arch ISO from official website](#). Preferably via Torrent since it doesn't load servers unnecessarily
- Copy ISO to your [Ventoy USB](#)
- Lookup your [motherboard's BIOS key](#) and boot to Arch Live Environment via Ventoy
