

This page would define setup of basic installation with my bare minimum to get further the installation to either a server or desktop usecase

### Info

Run these using your standard user with sudo if required

## DotFiles

### Create Useful Directories

```
1 mkdir -pv ~/Bench/Mount ~/GitIt/SyncFiles ~/info
```

```
1 mkdir -pv ~/GitIt/Wallpapers-PC ~/Downloads
```

## Syncthing

■ Install [Syncthing](#)

■ Sync `~/GitIt/SyncFiles` folder with following ignore patterns

```
1 .git
2 dotsPr/ssh/.ssh/known_hosts
3 dotsPr/ssh/.ssh/known_hosts.old
4 db
5 configBak/authelia
6 configBak/authelia-cloud
7 configBak/fenrus
```

■ Sync `PC-Walls` with Desktops
