

Adguard

Description

DNS Server with Ad-blocking just like Pi-hole

Warning

Modify `dhcpcd.conf` AFTER adguard installation

```
1 static domain_name_servers=192.168.29.12 #(1)
```

1. Put it at the end of the file
Change IP to LAN IP of Adguard server

Global Settings for Adguard

Note

This section features scripts and settings to be used regardless the installation method

Post Installation Configuration

DNS Settings

Set upstream DNS

```
1 https://dns10.quad9.net/dns-query
2 tls://1dot1dot1dot1.cloudflare-dns.com
3 https://cloudflare-dns.com/dns-query
4 tls://dns-unfiltered.adguard.com
5 https://dns-unfiltered.adguard.com/dns-query
6 1.1.1.1
7 8.8.8.8
```

Set resolution method to Parallel Requests

Test upstream and Apply
